

GOLD AWARD

Student profile

Student Name	
School/organization	
Project title	
Mentor name	

Before you start: Check the CREST Gold Award student guide for all the guidance and information you'll need to complete your CREST Award.

Completing your project: To complete your project, you should provide the following documents for your CREST Local Coordinator (EESW):

- A project report
- This student form

If you're doing a team project, each team member should have a separate student profile.

Tips for your project report:

- Use pictures, graphs, diagrams or photos to help explain things
- Include where you found the information for your background research
- Use the checklist on the next page to make sure you include everything you need to achieve your CREST Gold Award
- Number the pages in your report

After your project:

After completing your CREST Gold Award you can join the CREST Alumni Network to find out about great opportunities for young people:

www.crestawards.org/alumni

All scientists and engineers are creative. They use scientific and technical knowledge, make decisions, solve problems, evaluate and communicate their work. Throughout your CREST project you'll need to use and show these skills too.

Personal reflections

Now that you've finished your project, use this space to add further thoughts on what you did and evaluate each stage of the project process. The CREST Gold Award student guide gives an example of what to include. You can continue on a separate sheet if necessary and use diagrams or pictures if you want to.

- *How my project was successful/not successful*
- *What I learned*
- *What impact the results of my project might have on other people/the wider world*
- *What I would have done to improve my work*
- *What I'd do to develop the project in the future*

I confirm that I have read the British Science Association's Privacy Notice (available at www.crestawards.org/privacy-policy) and consent to my information being used for the purposes indicated.
