

#WinItWednesday 01/07/2020

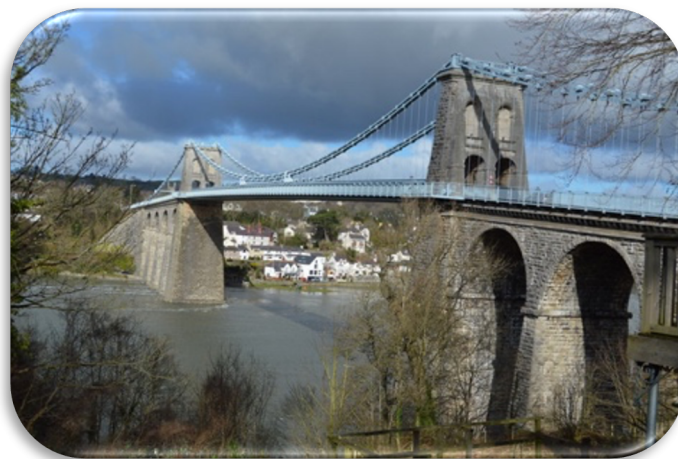

Each winner will receive an EESW goody bag and be entered into the draw for an Amazon voucher!

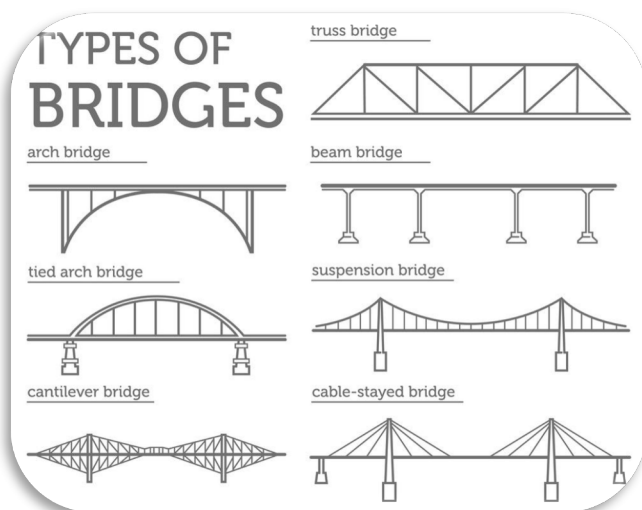

Choose one or both the Fun Challenge and  Stretch Challenge and get creative with your STEM skills! Good luck!

Fun Challenge: Build a Bridge

Architects and Engineers use many STEM skills when designing and constructing bridges. They must make the bridges safe, strong and suitable for the space they cover. Build a bridge using materials found in your home or classroom. How strong can you make it? Can you demonstrate its strength by placing heavy items on it?

Stretch Challenge  : Design a New Bridge

If you built a bridge for the Fun Challenge, why not design a new bridge for your area? Choose somewhere local to you that could be improved with a bridge and design your own! Consider things like the type of ground it would be built on, what kind of traffic it would carry, how long it would need to be, and what type of bridge it would be.

Submit your competition entry (either pictures, videos or designs) to i2e@eesw.org.uk or to our Twitter or Facebook account by 3pm Tuesday, 7th July. Winners announced 10am Wednesday 8th July. Good luck!
